Employment

2017 **Full stack web dev at Lange**
— Successfully worked as a Full Stack Web Developer at Lange, where I built and maintained various client web projects that generated significant profit and long-term value for the company.

2019 **Frontend Developer at Rwanda build**
— Successfully contributed as a Frontend Web Developer by building and improving various internal web projects that streamlined company operations. These solutions later evolved into major investments, significantly boosting the company's value and growth.

2020 **Frontend Developer at Consultified**
— Successfully contributed as a Frontend Web Developer by building a school project that helps students find internships and stay connected with their teachers. This experience strengthened my skills in creating user-friendly interfaces that support real-life student needs.
